Economic Overview And Outlook: Pennsylvania

Jobs

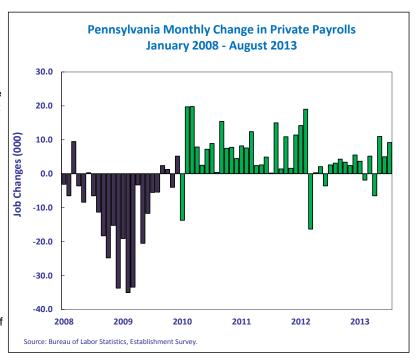

- Including August, the private sector has gained jobs nationwide for 42 consecutive months.
- In Pennsylvania, private sector employment fell by 5.2 percent from January 2008 to February 2010. Since February 2010, private sector employment has grown by 5.0 percent.
- In Pennsylvania, employees in the construction, manufacturing, and information services sectors faced the largest job losses (as a percent of employment within an industry) over the recession. Since the beginning of 2010, the following sectors in Pennsylvania have experienced the greatest employment increases: mining; leisure and hospitality; and professional and business services.*
- As the economy continues its emergence from the Great Recession, service-providing industries are projected to add the most jobs between 2010 and 2020. The largest gains over this period are expected to occur in the healthcare and social assistance, professional and business services, and retail trade sectors. Job gains in the goods-producing sector of the economy will be led by the construction and mining industries while the number of manufacturing jobs is expected to fall.

EMPLOYMENT

- The unemployment rate in Pennsylvania was 7.7 percent in August 2013, up 3.1 percentage points from December 2007, but down from its most recent peak of 8.7 percent in March 2010.
- 501,000 residents were counted among the unemployed in Pennsylvania during August 2013.
- In Pennsylvania, initial claims for unemployment insurance benefits totaled 92,619 during August, down 16.7 percent from the previous month. Since peaking at 183,821 in March 2009, initial claims for unemployment insurance benefits have declined by 49.6 percent.

EARNINGS

Between the start of the recession in the 4th quarter of 2007 and the 3rd quarter of 2009, inflation-adjusted total personal income in the United States declined 4.6 percent. Most recently, in the 1st quarter of 2013, total personal income is 2.5 percent above its 4th quarter of 2007 level.

Real per capita personal income (in 2005 \$) in Pennsylvania was \$37,476.20 in the 1st quarter of 2013, up from \$37,272.10 in the 1st quarter of 2011.

Housing

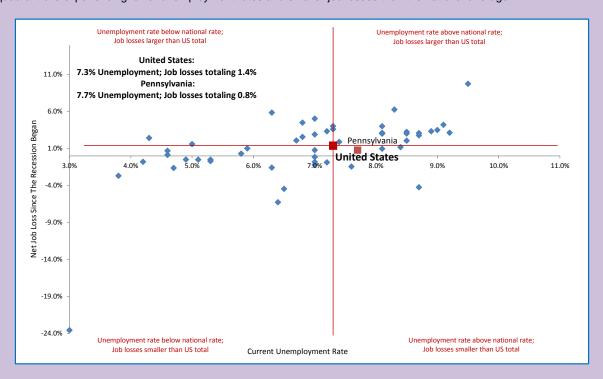

- After peaking in the first quarter of 2007, national home prices declined by 18.0 percent over 17 quarters. Between the second quarter of 2011 and the second quarter of 2013, the most recent quarter, national home prices rose by 4.1 percent.
- In Pennsylvania, home prices fell by 8.9 percent over 17 quarters from their peak in the first quarter of 2008. Since the second quarter of 2012, home prices in Pennsylvania have risen by 1.3 percent.
- As of the 2nd quarter of 2013, 3.4 percent of all mortgages, including 11.2 percent of subprime mortgages, were in foreclosure in Pennsylvania.
- Housing starts in Pennsylvania totaled 27,530 units (seasonally adjusted annual rate) in July 2013, an increase of 78.7 percent from June.
- Within the Northeast census region, which includes Pennsylvania, sales of new single-family homes totaled 33,000 units in July 2013, a decrease of 5.7 percent from June. Sales of existing single-family homes increased 1.7 percent to 590,000 units (at seasonally adjusted annual rates) from July to August 2013.

How Does Pennsylvania Compare To Other States?

Workers across the country were hard hit during the Great Recession. Although labor markets in many states have started recovering, employment in most states still remains below pre-recession levels. The chart below allows you to compare Pennsylvania to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Pennsylvania since the start of the recession (shown along the vertical axis) measures the toll the recession took on the job supply in Pennsylvania.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant are experiencing lower unemployment rates and smaller job losses than the national average.
